The buildings heretofore erected for dynamite manufacture are not suitable for making smokeless powder, and hence the necessity for extension of the plant's facilities. A large force of laborers, carpenters and mechanics is busily at work. Five car loads of material were sent to the plant yes terday and four more to-day.

By arrangement with the Universal Film Manufacturing Company, it is possible to read "The Trey O Hearts" in The Times-Dispatch ar also to see it in pictures at the Superior Theatre. Synopsis of preceding chapters: Th: trey of hearts is the death sign used by Seneca Trino in the private war of vengeance, which, through the agency of his daughter Judith, a woman of violent passions like his own, he wages against Alan Law, son of the man (now dead) who was innocently responsible for the accident which left Trine a helpiess cripple for life Alan loves and is loved by Rose, Judith's twin and double, but in all other respects her opposite. Judith vows to compass Alan's death, but Alan saves her life under dramatic circumstances, and so, unwillingly, wins her love. Thereafter Judith is actuated in turn by the old hatred, the new love, and jealousy of her sister Rose; she becomes allenated from her father through her failure to carry out his homicidal plans, and because of the ald she has extended Alan in his flight with Rose from the vengeance of Trine through the mountains of Western Arizona. Alan, Rose, Trine, Judith and Barcus, a friend of Alan's, all in Trine's automobile, are halted by motor trouble, while the chauffeur goes for assistance.

Marriage of Petersburger.

On the afternoon of October 30, at Mt Laurel Church, Miss Minta Richman, of Halifax Couffty, and Lewis Brock, of ePtersburg, were narried. The church was beautifully decorated in colors of green and white. The bride wore a blue traveling suit, with hat to match, and carried a bouquet of roses. Miss Ellie Richmond was maid of honor, gowned in Nile green chilfon over white satin, and the best man was James Pritchett, of Petersburg, little Miss Elizabeth, sister of the bride, carried the wedding ring on a silver waiter.

The musical ten given this afternoon at the residence of Mrs. Alexander Hamilton, on South Sycamore Street, was very largely attended, and a brilliant musical program was executed. The ten was for the benefit of destitute Belgians, and the silver offerings were liberal.

the little nodes of tonsil on the roof of the throat—seems to be particularly vulnerable to infection. It dauses more trouble than the other three tonsils put together, at least in childhood. And why? Well, briefly, because it doesn't get a chance. We coddle our bables too much. We dress them too warmly, we keep them in rooms that are heated and dry, and the bables suffer for want of fresh air.

The Cause and Prevention of Adenoid
Hypertrophy.

Each fresh "cold in the head" is, of
course, a bacterial infection acquired
from close contact with another "cold."
Indoors, in vitated, dry, overheated
air, the bacteria of "colds" are most
likely to thrive and spread from patient
to patient. Johnnie's sore throat germs
are capable of playing the role of
father's bronchitis germs, or mother's
pneumonia germs, or baby's "cold"
germs. Each cold leaves the baby's
adenoid tissue (the whole ring of
it, the whole four tonsils) more or
it, the whole four tonsils) more or
less permanently enlarged. When the
tonsil of pharynx, the adenoid, becomes
so thickened as to obstruct free breathing, then the child has "adenoid hypertrophy," or "adenoids." Hypertrophy is a medical term for overgrowth.
When tonsils or adenoids are so enarged that they interfere with natural
nose breathing, the child's chest and
general development will be seriously
impaired if the obstruction is not removed. When a child has frequent earaches or running ear, that is almost
positive proof that the tonsils or a moderate
adenoid hypertrophy by no means indicates' a need of operation, for we must
remember that these structures still
have defensive functions even when se
enlarged. However, there are many
cases in which a despot or nidus of infection gains a foothold in the tonsils
or adenoids and, while not causing
serious ear or other complications of
an obstructive character, seriously impairs general health or actually precipitates an attack of joint inamma
tion ("rheumatism") or heart valve in pairs general health or actually pre-cipitates an attack of joint lnamma-tion ("rheumatism") or heart valve in-flammation or other dangerous condi-tion. Then the question of treatmen is up to the medical attendant.

Reply.—We should dislike to have it tried on us. But even if you can endure the irritation, it will not cure your catarrh. You can't cure your own catarrh. It requires, first, a diagnosis to see what is causing it, and, next local or general treatment directed to the particular cause or causes at play.
